

SKILLFUL AI

Democratizing AI, One Skill at a Time

A platform that empowers anyone to build their
dream AI assistant, no coding required

Problem

Today's AI is locked in a black box: inaccessible, inflexible, and opaque

Existing AI tools suffer from limitations in three key areas

1

Generic AI

One-size-fits-all fails, leaving specific needs unmet

2

Personal AI creation

Complex platforms lock out potential creators

3

Digital AI assets

Monetization and security are a tangled mess

Solution

A comprehensive ecosystem to develop, deploy, own and exchange personalized AI assistants from your computer or smartphone

Skillful AI democratizes AI, fostering cross-industry innovation and personalized solutions

Modular AI Assistants

Our pre-built AI assistants are designed based on the idea of "skills" - separate units of work that can be combined in numerous ways. This approach enables you to create an AI assistant that is ideally suited to your specific requirements

AI Marketplace

The Skillful AI marketplace is a unique platform that enables users to buy, sell or trade AI skills and assistants. We take it even further by integrating NFT technology, which allows one to truly own AI assistant as a distinctive digital asset

AI Development Tools

With Skillful AI, building your own AI models is accessible and user-friendly with our innovative AI creation tools

Opportunity

By unlocking these markets, Skillful AI democratizes AI for everyone, not just billion-dollar companies, opening new opportunities for growth and innovation

5.000M+

Skillful AI's Edge

Unique Customization & Integration

Integrating thousands of AI tools from any provider, Skillful AI offers unmatched flexibility. Our proprietary memory solution enables deeper personalization to make your AI unique

Data Democracy & Decentralization

Skillful AI allows for complete data ownership through partnering with DePin providers. This enables fully decentralized storage and retrieval, giving users complete control of privacy and security

Monetization Powerhouse

Skillful AI enables creators to monetize their AI creations by offering an open marketplace and robust token utility for buying, selling, and trading

Future-Proof & User-Centric

Skillful AI offers cutting-edge APIs and tools that are affordable, easy-to-use, and automate processes. Our platform unleashes the AI potential of both technical and non-technical users

Technology

The next generation of AI creator tools

Developer Interface

Empowering innovation for Developers

- Widgets
- Public API
- Web3/Blockchain Integration
- AI Creation Tools

User Interface

User Friendly & Optimized for productivity

- Widgets
- Analytics & Reporting
- Marketplace
- Dashboard

Personal Models

Next level AI customization

- Information Presentation
- Preferences
- Perspective
- Interactions
- Data Source

AI Providers

Tailor AI solutions to unique needs, ensuring a perfect fit for business or personal use with constantly evolving integrations to meet ever-changing requirements.

Business & Tech

- Director of Trading Research and Development at Plannatech
- Mathematician
- Data Scientist with 10+ years of experience

Amit Patel

Business

- Co-founder - AI migraine digital healthcare
- Partner - Fusion 7 VC
- Business development and strategy expert in both Web2 and Web3

Gabriel Gagliardini

Marketing

- Founder - El Kilombo
- 5 Million Followers on Instagram
- Connected to the top platforms in LATAM

Alex Becker

KOL & Strategy

- Successful entrepreneur
- Influencer
- Founder of HYROS

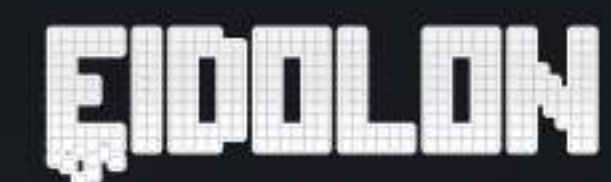

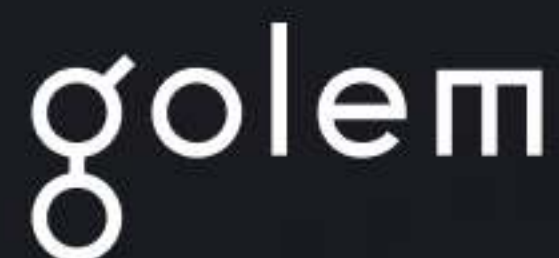

Brian Rose

Marketing

- Founder - London Real
- Ex. Wall Street Trader
- Podcaster and Educator with billions of views

Partners

Business Model & Use Cases

Skillful AI fuels its platform ecosystem through a mix of freemium subscriptions, marketplace transaction fees, custom enterprise solutions, data storage partnerships, and its SKAI token for premium features and potential future governance

Business Model

- Paid access to developer tools and support (Monthly)
- Paid access to our custom built models for users (Monthly)
- B2B solutions for private needs
- Royalty & transaction fees on the marketplace

Go-to-Market

Market Segmentation & Targeting

Laser-focused

Targeting tech-savvy individuals, creators, businesses, and AI/Blockchain enthusiasts for efficient initial market penetration.

Strategic Partnerships

Collaborating with projects, businesses and individuals with already existing users/communities/followers in creating custom AI solutions to onboard new users in large numbers to Skillful AI.

Community Building and Engagement

Community Rewards Programs: Offer incentives as rewards for participation, such as referrals, social media shares and using the platform early. Tapping into existing communities through co-marketing partnerships. Gamification of the platform and rewards for early testers.

Marketing Strategy

Content Powerhouse

- Industry insights, project updates, and founder-driven pieces showcase expertise and vision
- Leveraging authority for wider reach and engagement
- Video content strategy

Platform Launch Marketing

KOL campaign, Paid media strategies with focus on conversion of users and affiliate marketing
